Dear Sir:

I, DAOCHENG ZHU, do declare and say as follows:

1. I am an inventor of the above-identified patent application.
2. I am familiar with claims 77, 79-81 and 83-96 under examination in the above-identified patent application.
3. I am a co-author of Zhu et al., (Abstract 273, Clinical Immunology 99(1):193, April 2001) ("Zhu et al. Abstract"), along with Min Zhang, Christopher L. Kopley, Ke Zhang and Andrew Saxon
4. It is my belief, based upon my personal knowledge of the individual contributions of each of the co-authors of the Zhu et al. Abstract, and my understanding of the subject matter of claims 77, 79-81 and 83-96 of the present application that the work relating to fusion molecules comprising a human IgG heavy chain constant region sequence connected to a human IgE heavy chain constant region sequence, is the joint invention of Ke Zhang, Andrew Saxon and myself, and Min Zhang and Christopher L. Kopley made no inventive contribution.

5. I declare further that all statements made in this Declaration of my own knowledge are true and that all statements made on information and belief are believed to be true and further, that these statements are made with the knowledge that willful statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent granted thereon.
